The following action is in response to the amendment received June 15, 2005.

Allowable Subject Matter

Claims 1-20 are allowed. In accordance with MPEP 608.01(n)IV, claims 1, 2, 6-18, 3, 4, 19, 20, and 5 will be renumbered for printing as claims 1-20, respectively.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to show or render obvious a friction engaging device as defined in claim 1, particularly including a ring gear spline-coupled to an inner surface of the rotating drum and contacting an inward flange of the rotating drum; and wherein a centrifugal oil passage is formed between the ring gear and the inward flange and a plurality of through holes are formed in the rotating drum and through which lubricating oil, that has flowed into the spline-coupled portion, flows to an outside of the rotating drum.

The amendment to the specification, filed June 15, 2005, corrects the spelling error on page 8, thus overcoming the objection to the specification. Accordingly, the objection to the specification set forth in the previous Office action is withdrawn.

Applicants' amendments to the claims, filed June 15, 2005, overcome the previous rejection of the claims under 35 USC 112, second paragraph. Accordingly, the rejection is withdrawn.
